

Krishna Subedi

Full-stack engineer — multi-tenant marketplaces & backends with Spring Boot, React, Node.js

Kathmandu, Nepal · krishnasubedi219@gmail.com · github.com/Luke23-45 · linkedin.com/in/krishna-subedi

EXPERIENCE

Neryva

Jul 2025 – Present

Member of Technical Staff · Remote

- Built multi-tenant backend services for the AI agent platform — row-level security and cryptographic isolation preventing cross-tenant leakage in RAG pipelines, REST APIs and WhatsApp/Slack webhooks, asynchronous event backbone (brokers, task queues), and real-time streaming over SSE/WebSockets; production deployment.
- Designed the drag-and-drop agent canvas where users assemble customized agents from memory, instruction, and dashboard components, plus guardrails and automated evaluation pipelines for production agent behavior across backend, frontend, and deployment. Demo: neryva.com.

Smaitic Labs

Apr 2024 – Jul 2025

Full-stack Developer · Kathmandu, Nepal

- Built a three-level admin hierarchy (main/state/seller) with role-specific access and a multi-tenant Spring Boot backend with hierarchical RBAC, ZipCode-based delivery logistics, and a commission engine.
- Shipped [Vanidya](#) marketplace apps: native Android (Kotlin), offline-first PWA, real-time order tracking.

Nepal Oil Corporation Limited

Oct 2023 – Mar 2024

Software Engineer · Kathmandu, Nepal

- Built a Python time-series forecasting system for regional fuel demand (diesel, petrol, aviation) supporting inventory allocation and supply-chain decisions.
- Automated mission-critical daily dispatch reporting via Python/SQL pipelines, replacing manual reports with real-time executive dashboards for national fuel logistics.

PROJECTS

Shenz: EdTech Blog and Registration Backend

2023

Personal Project · Full-Stack

- Built a RESTful Django REST Framework API (blog CRUD, category search, pagination, instructor registration) consumed by a React frontend, with TinyMCE rich text and CORS integration.

EDUCATION

Bachelor of Engineering in Mechanical Engineering

2019 – 2023

Tribhuvan University · Kathmandu, Nepal · Licensed PE · Focus: Robotics, Kinematics, Control Systems

SKILLS

Languages: Python, TypeScript, Java, Kotlin, SQL, JavaScript · **AI/Data:** LLMs/Generative AI, RAG, LLM Evaluation, FastAPI, Multi-Tenancy, Time-Series · **Web:** Spring Boot, Node.js (Express), Django, React, Next.js, Redux, Tailwind, Material UI · **Data/DevOps:** PostgreSQL, MySQL, MongoDB, Redis, Docker, Kubernetes, Jenkins, AWS · **Eng:** Git, CI/CD, Linux, Jest, Microservices, REST, JWT, RBAC, PWA
